

EXHAUST TECHNOLOGIES®

Passenger Car & Light Truck

# Web Based Training

For the Exhaust Professional

<http://elearning.apexhaust.com/>

For over 80 years, AP Exhaust Products has been known as the leading manufacturer of exhaust and emissions products.

This initial information module presents the many offerings of AP Exhaust Products, and our utilization of chemical & engineering expertise provided by Aristo Catalyst Technologies.

There are nearly 238 million 1975 through 2011 passenger cars and light trucks traveling the roads in the United States today.

All these vehicles contribute to air pollution to some degree. As these vehicles age, their OEM operating systems and Catalytic Converters become less efficient.

*These vehicles' owners will become your customers!*

**Is the MIL light on? Have you diagnosed and repaired the Real Problem?**

The leading cause of emissions test failure is engine system component failure. Poor vehicle maintenance is a major contributor to the creation of conditions that eventually lead to converter inefficiency.

*You must find and repair the Real Problem!*

**There are many variables that can have an adverse effect on exhaust emissions.**

Once you have identified that catalytic converter destruction or deactivation has occurred, you must then determine which component within the engine/emissions operating system has caused the converter to fail or be destroyed.

*Understanding these components is important!*

**Are you sure the converter needs to be replaced?**

Following Federal and/or California guidelines, test driving the vehicle, downloading any DTC's, identifying component failures, and determining the correct replacement converter(s) for the vehicle are some of the tasks you must do to complete a proper and long lasting repair.

*Review carefully!*

## Online Learning Portal

[www.APEXHAUST.com](http://www.APEXHAUST.com)

AP Exhaust Products is pleased to announce the availability of ONLINE training programs designed to provide supplemental exhaust and emission system knowledge. Our learn at your own pace programs will progressively advance your knowledge of our products and the key exhaust system components with particular attention given to emissions and catalytic converters.

To join the AP Online eLearning Program go to <http://elearning.apexhaust.com/>

Select **CREATE NEW ACCOUNT** to register. You will receive email verification with instructions.

When asked for the **ENROLLEMENT KEY** enter FBBO2936

AP Exhaust Products distribution is provided by BESTBUY DISTRIBUTORS LTD
