

# TECH TRAINING

Join the Mevotech team as we explore contemporary issues affecting chassis in the aftermarket.

Understand how government legislation, CAFE standards, OEM light-weighting and harmonization are impacting vehicle design and function, and become better equipped to diagnose and tackle these challenges head on.

## MARKET TRENDS

- Evolution in OEM and aftermarket chassis engineering, design and technology
- Government regulation on vehicles 2009+ and OEM response
- Changes in the parts content per vehicle and service intervals
- Effect of new chassis parts on fatigued platforms and related sensors
- Improved bay efficiencies

## ENGINEERING

- Common chassis design flaws and available solutions
- Examining the engineering, design and material capabilities of OEM and aftermarket options
- “Light-weighted” fleet vehicles and extending service life
